

**DEVAWRITER PRO**

# **DEVAWRITER PRO**

## **DOCUMENTATION**

**[This will, in good time, become a comprehensive guide]**

**Devawriter Pro presents the user with a choice of modified keyboard layouts for Devanagari and Latin transcription input.**

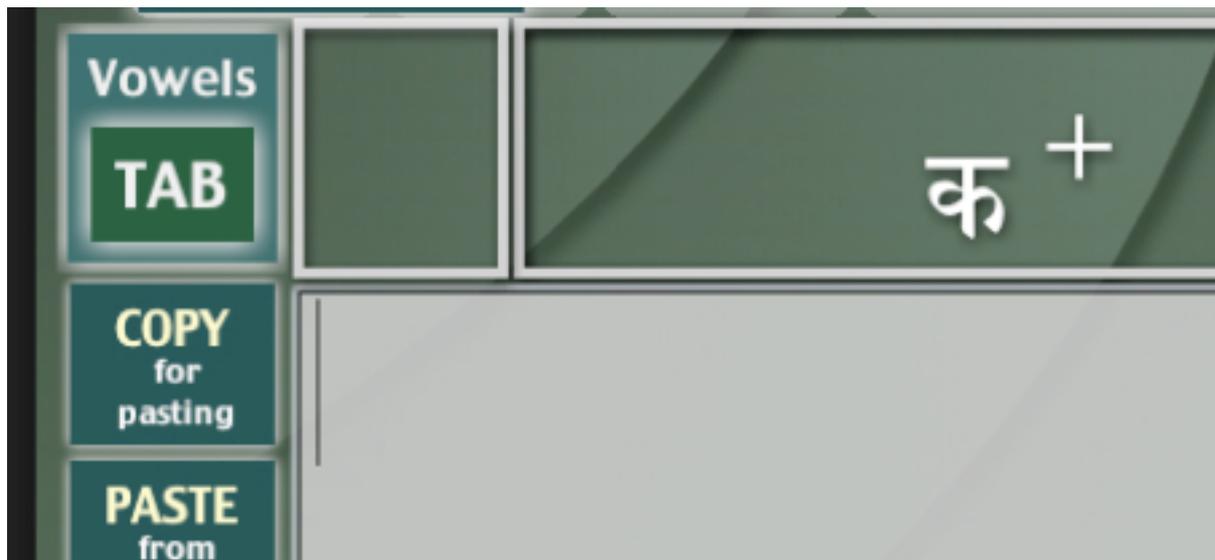

**Two of the interfaces use the Devawriter.ttf font's vast range of conjunct consonants to provide an aesthetic Devanagari text rather than the more standard one made by combining half-letters.**

---

## DEVAWRITER PRO

### Entry tips.

1. If a **consonant** is selected (either via the computer keyboard or by clicking on the onscreen keyboard) a **consonant** is entered in the **CONJUNCT COMPOSITION WINDOW**:

2. A **conjunct consonant** may be terminated by either:
  - 2.1. Holding down the **SHIFT** key while the last **consonant** component is entered:

## DEVAWRITER PRO

- 2.2. Pressing the **TAB** button to bring up the **vowel** input keyboard, and then inputting a vowel.
