

Adding/Removing Toolbar Buttons

Introduction

This sample shows how to add/remove toolbar buttons in Acrobat using the Acrobat JavaScript APIs

`addToolButton` takes an Icon Stream Generic Object. An Icon Stream Generic Object has three properties, a function that returns the stream data, the width and the height. To demonstrate, see the code associated with the add button icon below.

The stream is a hexadecimal string that represents the alpha, red, green and blue channels. Each four byte block representing a single pixel.
