## 19.01.2003 | X13 Db Editor V1.7

X13 DB Editor is a database editor that allows everybody to put nearly any database on the web for viewing and/or editing without needing any coding. The X13 DB Editor Engine is written with Microsoft Active Server Pages (ASP) for IIS 4. It has been tested successfully on NT 4, Personal Web Server (recommend update to MDAC 2.0) Win9x and ChiliASP for UNIX.
